

# Health, Healthcare and Human Services: What's Next?

CWDA Conference

Steve Hornberger, MSW

October 3, 2013

Sacramento, CA

# Why are we here today?

No one system has the mandate, resources, or reach to address both person-specific issues and the larger social conditions that exacerbate behavioral health problems, such as poverty, racism, inadequate housing, homelessness, poor schools, crime, and disparities.

Health is too important to leave solely for the health system.

# Why are we here today?

“The pressures for fundamental change in health care have been building for decades...

Already unsustainable costs, an aging population, advances in medicine, and a growing proportion of patients in low reimbursement government programs have made the status quo unsustainable. Change is inevitable.”

# Proposed Shared Vision

A community where all are safe, well and healthy with a sense of purpose, belonging and opportunities to achieve their aspirations.

# Key Demographic Trends

- Changing US population (over 20 years)
  - larger            282 up to 350 million
  - older            12% up to 18%
  - diverse           81% down to 78% white
- Virtually all persons with BH conditions will be insured
- Medicaid (80 million) and Medicare (75 million) will continue to grow

# Why are we here today?

- In 2005, federal, state, and local government spending as a result of substance abuse and addiction was at least \$467.7 billion, or 10.7 % of their combined \$4.4 trillion budgets.
- For each dollar of the \$467.7 billion spent,
  - 95.6 cents went to shoveling up the wreckage and only
  - 1.9 cents on prevention and treatment,
  - 0.4 cents on research,
  - 1.4 cents on taxation or regulation and
  - 0.7 cents on interdiction.

# Health Differences Between England and the US for 55-64 Year Olds

# Life expectancy at age 25 by education level in the US, 1988-98

LE at age  
25

# Life expectancy at birth by socioeconomic level in the US

Low Income  
High Income

# WHY NOW

# National Policy Level

Healthy People 2020

National Prevention Strategy

National Quality Strategy

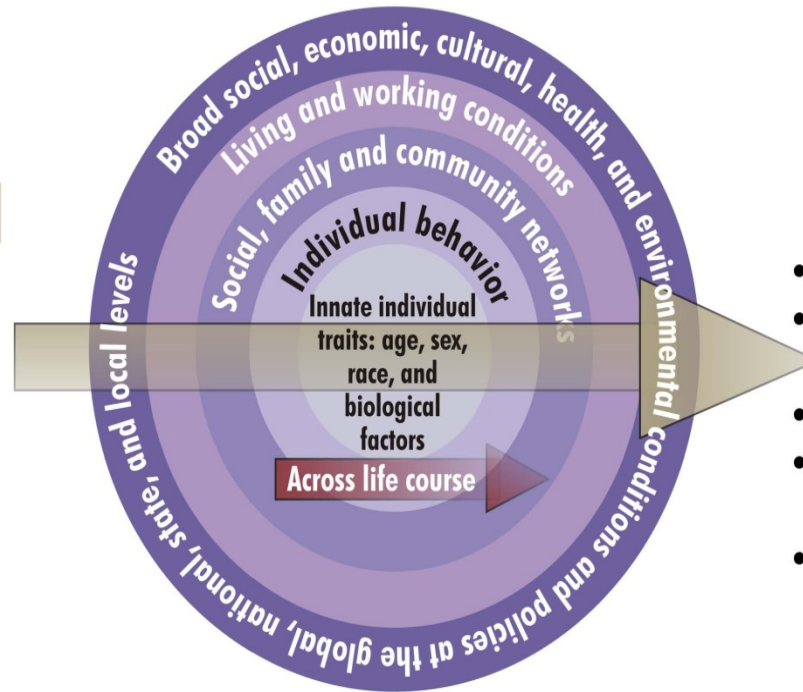

Centers for Medicare and Medicaid  
Services (CMS)

# Action Model to Achieve Healthy People 2020 Overarching Goals

## Determinants of Health

## Interventions

- Policies
- Programs
- Information

## Outcomes

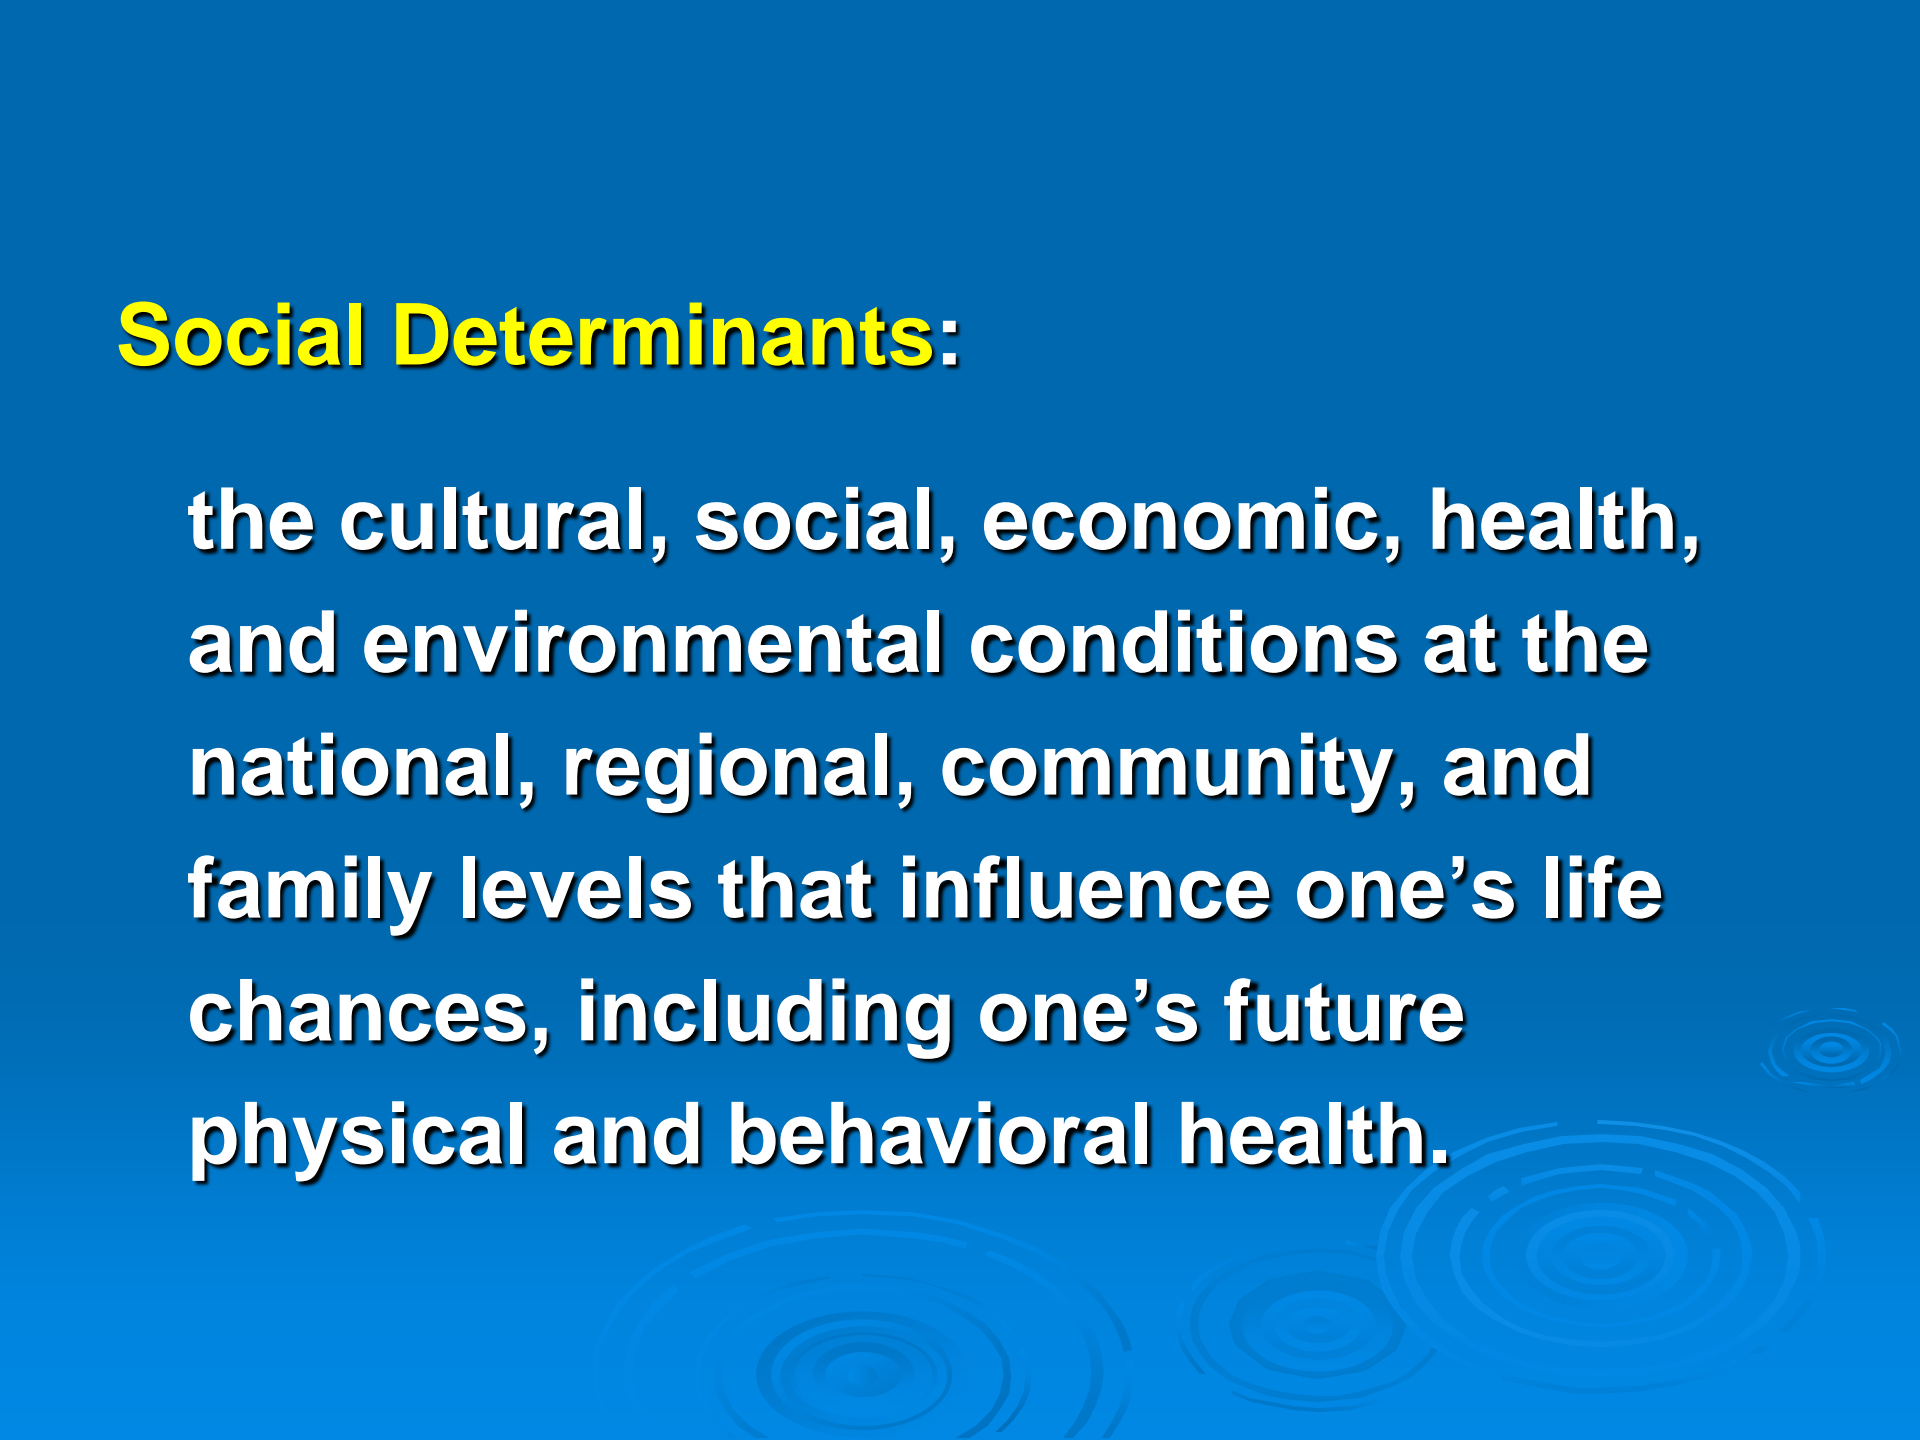

- Behavioral outcomes
- Specific risk factors, diseases, and conditions
- Injuries
- Well-being and health-related Quality of Life
- Health equity

## Assessment, Monitoring, Evaluation & Dissemination

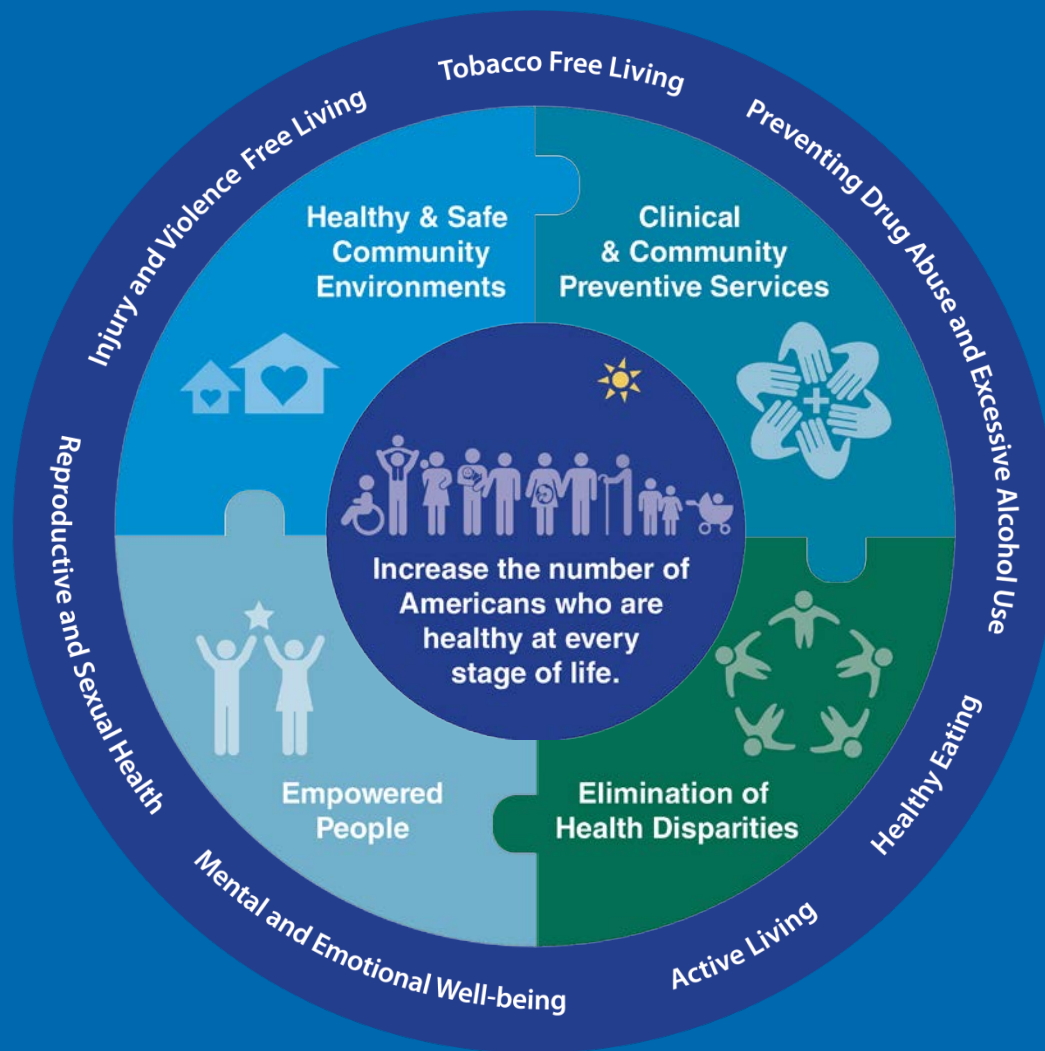

## **Social Determinants:**

**the cultural, social, economic, health, and environmental conditions at the national, regional, community, and family levels that influence one's life chances, including one's future physical and behavioral health.**

# National Prevention Strategy

# The Six Goals of the National Quality Strategy

- 1 Make care safer by reducing harm caused in the delivery of care
- 2 Strengthen person and family engagement as partners in their care
- 3 Promote effective communication and coordination of care
- 4 Promote effective prevention and treatment of chronic disease
- 5 Work with communities to promote healthy living
- 6 Make care affordable

# CMS: The “Triple Aim”

# We need delivery system and payment transformation

## *Current State –*

Producer-Centered

Volume Driven

Unsustainable

Fragmented Care  
Systems

FFS Payment  
Systems

## *Future State –*

People-Centered

Outcomes Driven

Sustainable

Coordinated Care  
Systems

## *New Payment Systems*

- Value-based purchasing
- ACOs Shared Savings
- Episode-based payments
- Care Management Fees
- Data Transparency

# Driving Healthcare System Transformation

## Un-managed

Fee  
for Service

- **Fee For Service**
  - Inpatient focus
  - O/P clinic care
  - Low Reimbursement
  - Poor Access and Quality
  - Little oversight
- **No organized networks**
- **Focus on paying claims**
- **Little Medical Management**

## Coordinated Care

Accountable  
Care

- **Organized care delivery**
  - Aligned incentives
  - Linked by HIT
- **Integrated Provider Networks**
- **Focus on cost avoidance and quality performance**
  - PC Medical Home
  - Care management
  - Transparent Performance Management

## Patient Centered

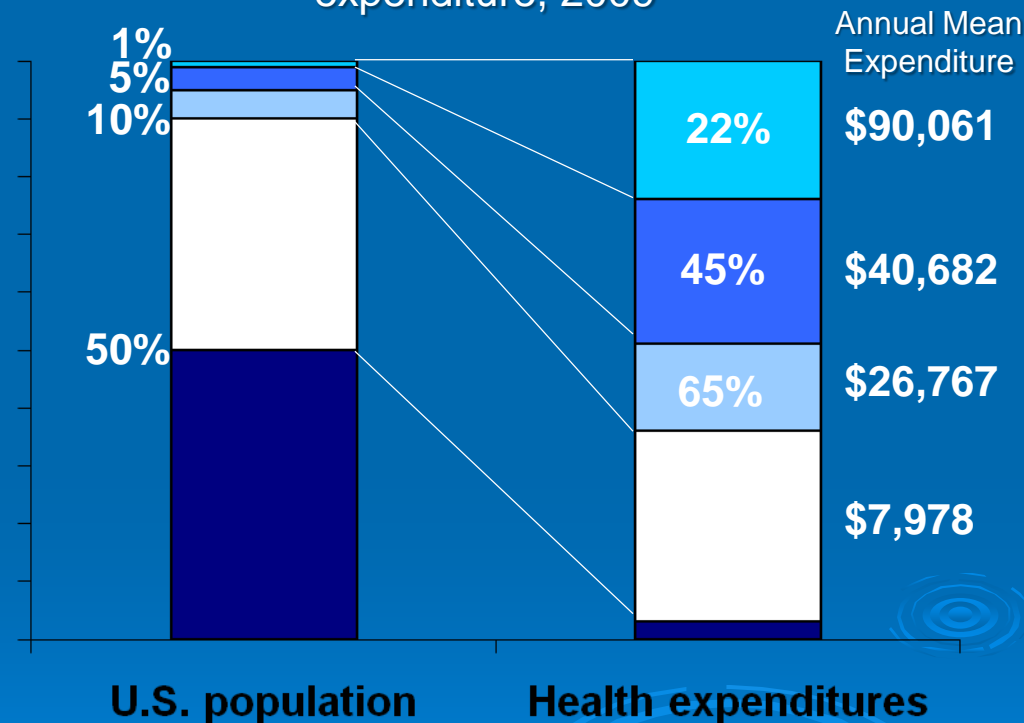

Integrated  
Health

- **Patient Care Centered**
  - Personalized Health Care
  - Productive and informed interactions between Patient and Provider
  - Cost and Quality Transparency
  - Accessible Health Care Choices
  - Aligned Incentives for wellness
- **Multiple integrated network and community resources**
- **Aligned reimbursement/care management outcomes**
- **Rapid deployment of best practices**
- **Patient and provider interaction**
  - Information focus
  - Aligned self care management
  - E-health capable

# For Savings, Go Where the Money Is

- 10% of patients account for 65% of costs
- Focus efforts on patients with highest costs
- Three part strategy:
  - Primary care/delivery system reform
  - Payment reform
  - Health information technology
- Leadership can come from:
  - Federal government
  - State government
  - Employers
  - Providers
  - Insurers
  - Collaboration among all

Distribution of health expenditures for the U.S. population, by magnitude of expenditure, 2009

# A Person/Family Centered Approach

- Is Strengths Based –Assumes people have abilities, capacities
- Role focused, not problem focused (problems interfere with performing desired roles, diagnosis is not a role)
- Promotes direction of the process by the person/family
- Adopts an individualized approach to services (not a cookie cutter set of programs)
- Where changes made in individual circumstances may have system wide implications that benefit others (innovations)

# CMS Definition

“...identify and access a **PERSONALIZED** mix of paid and non-paid services and supports that will assist him/her to achieve **PERSONALLY-DEFINED OUTCOMES** in the most inclusive community setting. The individual identifies planning goals to achieve these outcomes in **COLLABORATION** with those that the individual has identified , including medical and professional staff ....”

# Putting the Pieces Together in a Person-Centered Plan

## GOAL

as Defined by Person

Strengths to Draw Upon

Barriers Which Interfere

## Short-Term Objective

- Behavioral
- Achievable
- Measureable

## Interventions/Action Steps

- Professional/"Billable" Services
- Clinical & Rehab
- Action Steps by Person in Recovery
- Roles/Actions by Natural Supporters

# The plan is one slice in the pie...

The *practice* of PCP can only grow out of a *culture* that fully appreciates recovery, self-determination, and community inclusion.

Can change what people “do”... but also need to change way people feel and think.

**Plan:** (a written document)

**Process:**  
(a way of doing)

**Product:**  
(multi-dimensional outcomes)

**Philosophy:**  
(a way of thinking & feeling)

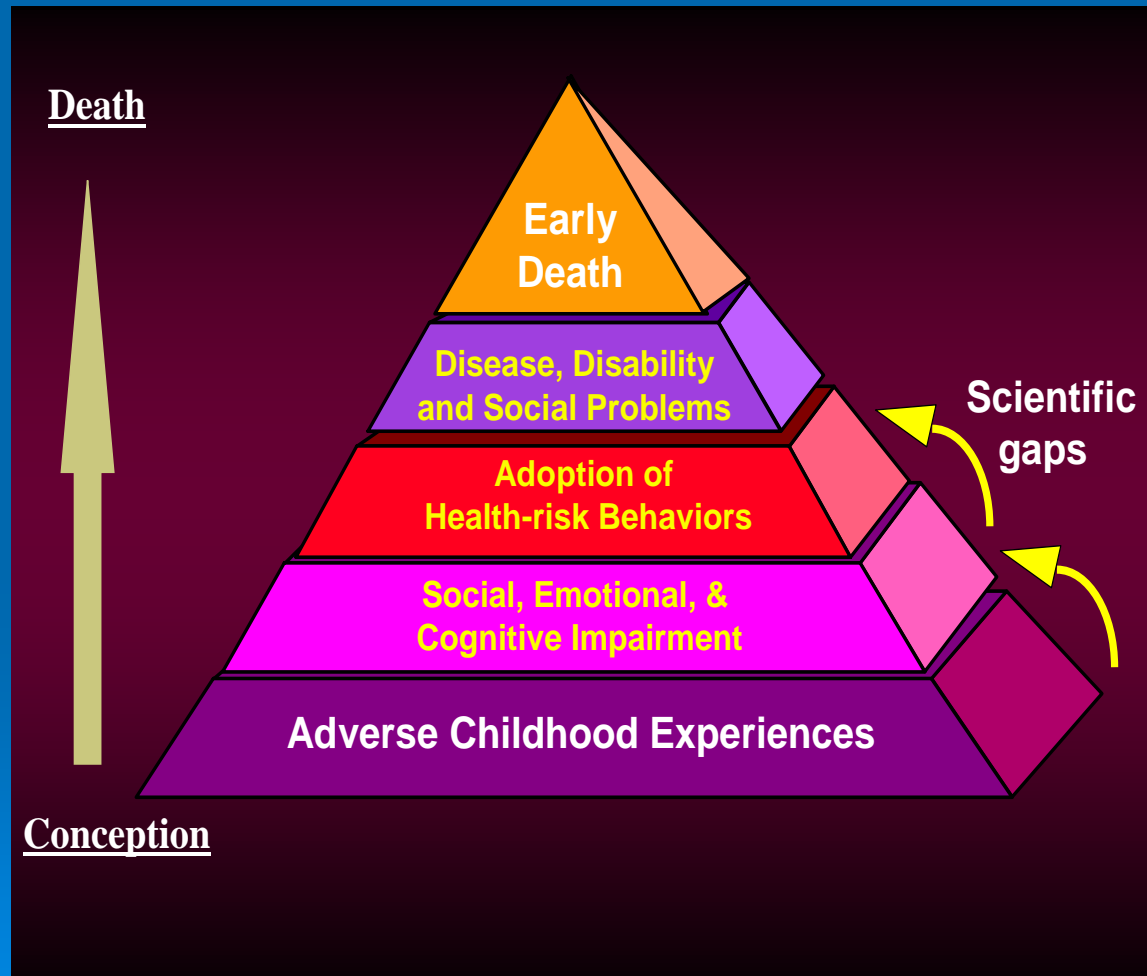

# WHY FAMILY

# Adverse Child Experiences Study

# Adverse Childhood Experiences Study

- Fairly common
- Generally clustered
- Have a cumulative effect on healthy development and health care status

# What Do They Need?

## Caregivers:

- **Words** to share experiences
- **Understanding** of family disease
- **Time** with their children for healing
- **Making amends and forgiveness**

## Children:

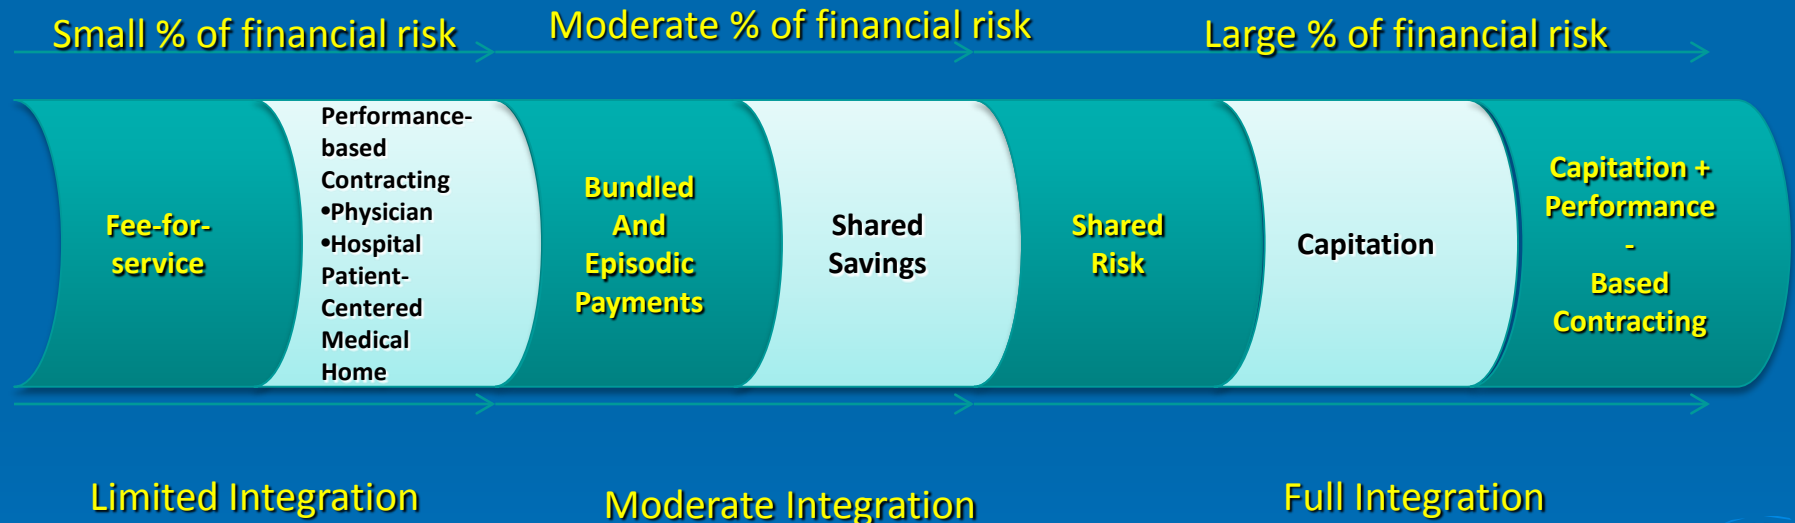

- **Words** to say what happened
- **Understanding** of family disease
- **Time** with their caregivers to heal
- **Knowledge** that it isn't their fault

# WHY PROVIDERS

The shift toward increased collaboration, outcome-based payment, and new benefit design is driving innovation in both payment models and delivery system configuration.

## Compensation Continuum (Level of Financial Risk)

Continuum of risks represents multiple value-based contracting options.

# Leadership Skills

- Adaptive vs technical
- Collaborative
- Philadelphia transformation
  - Why, what, how
- Institute for Health Improvement
  - Will, ideas, execution

# Model for Improvement

What are we trying to accomplish?

How will we know that a change is an improvement?

What change can we make that will result in improvement?

## Setting Aims

Improvement requires setting aims. The aim should be time-specific and measurable; it should also define the specific population of patients that will be affected.

## Establishing Measures

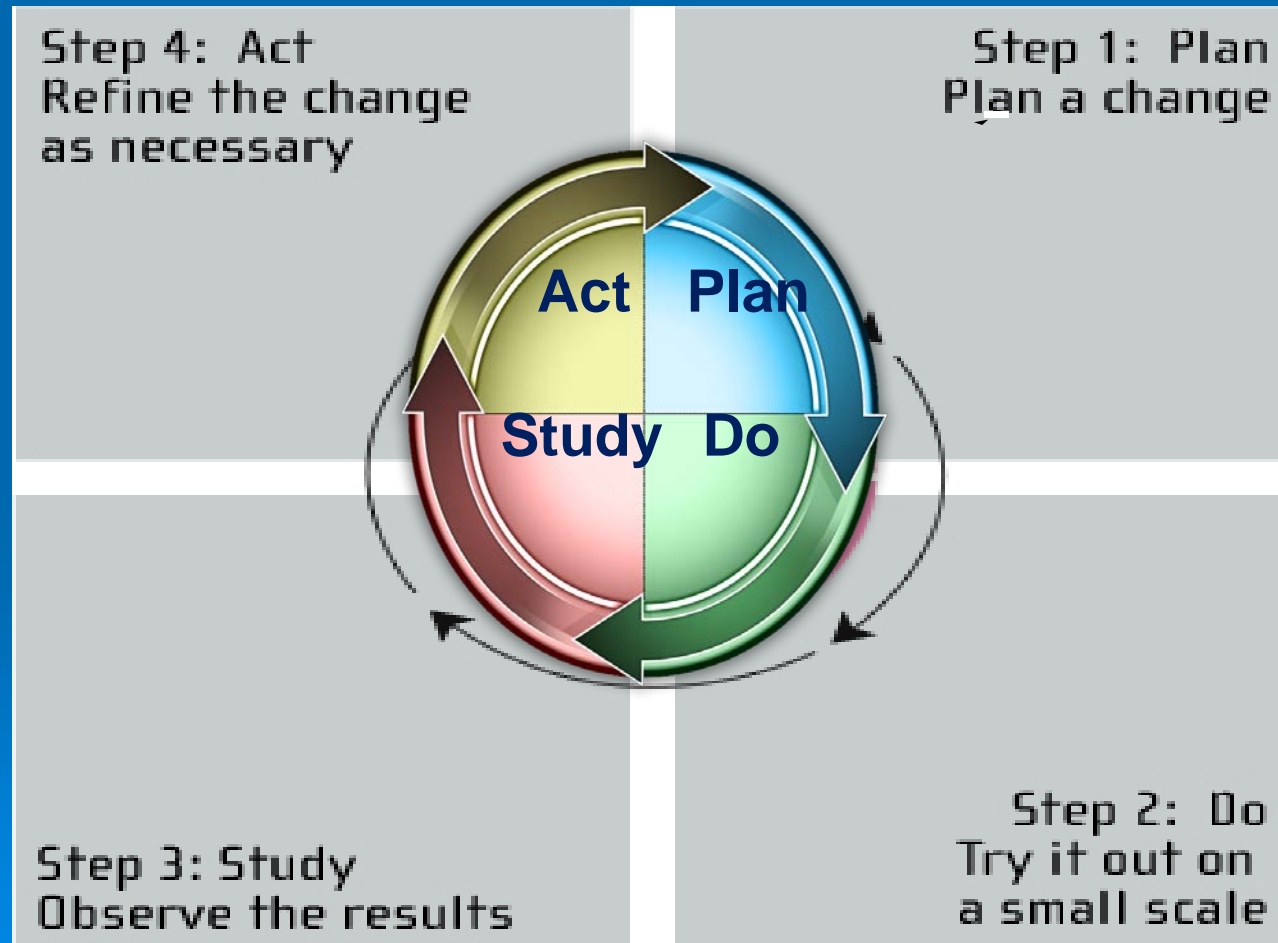

Use quantitative measures to determine if a specific change actually leads to an improvement.

## Selecting Changes

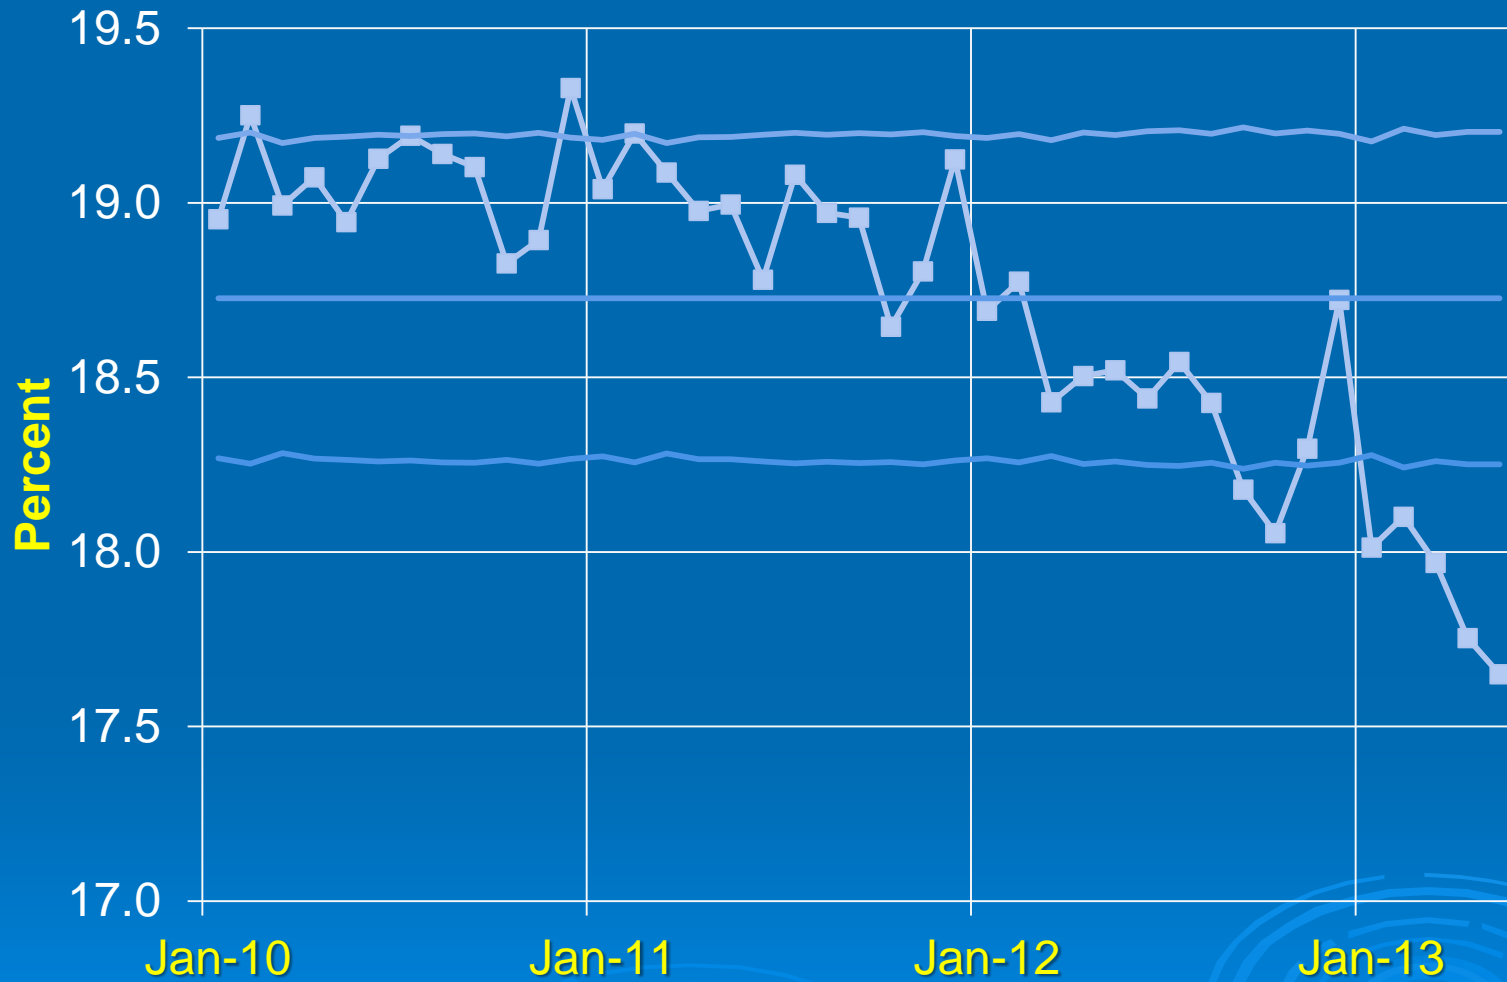

All improvement requires making changes, but not all changes result in improvement. Organizations therefore must identify the changes that are most likely to result in improvement.

# The PDSA Cycle for Learning and Improvement

# Medicare All Cause, 30 Day Hospital Readmission Rate

# Partnership for Patients: Hospitals Continue to Generate Increases in Reporting, Improvement and Achievement on More Harm Areas

# WHY COMMUNITY

# EXTERNAL ASSETS

Support	<ol style="list-style-type: none"><li>1. Family support</li><li>2. Positive family communication</li><li>3. Other adult relationships</li><li>4. Caring neighborhood</li><li>5. Caring school climate</li><li>6. Parent involvement in schooling</li></ol>
Empowerment	<ol style="list-style-type: none"><li>7. Community values youth</li><li>8. Youth as resources</li><li>9. Service to others</li><li>10. Safety</li></ol>

# EXTERNAL ASSETS (2)

<p>Boundaries &amp; Expectations</p>	<ul style="list-style-type: none"><li>11. Family boundaries</li><li>12. School boundaries</li><li>13. Neighborhood boundaries</li><li>14. Adult role models</li><li>15. Positive peer influence</li><li>16. High expectations</li></ul>
<p>Constructive Use of Time</p>	<ul style="list-style-type: none"><li>17. Creative activities</li><li>18. Youth programs</li><li>19. Religious community</li><li>20. Time at home</li></ul>

# INTERNAL ASSETS

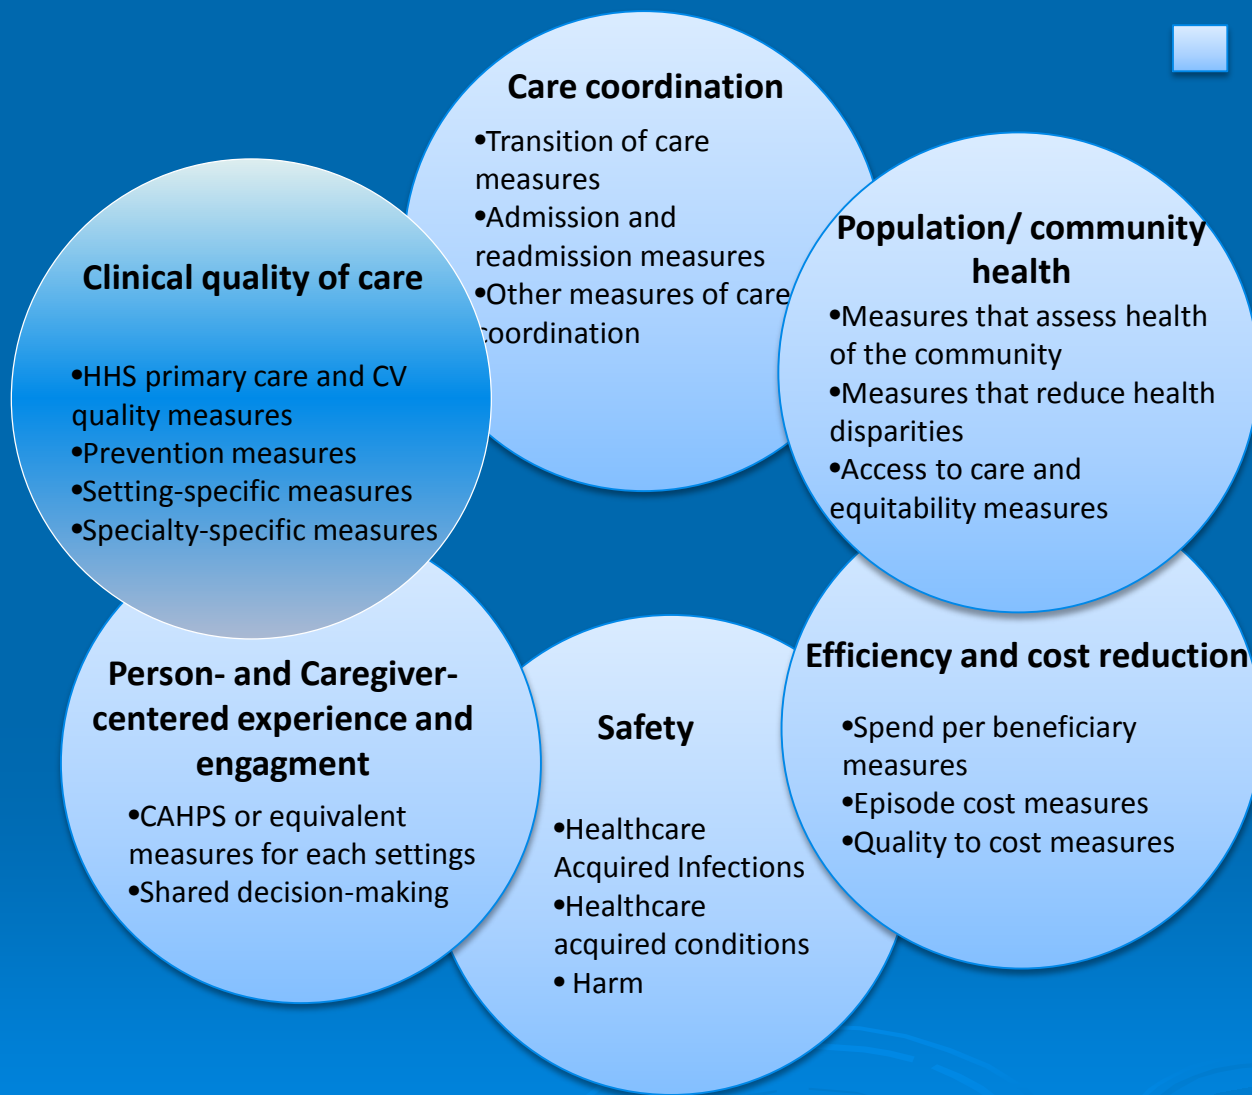

<b>Commitment to Learning</b>	21. Achievement motivation 22. School engagement 23. Homework 24. Bonding to school 25. Reading for pleasure
<b>Positive Values</b>	26. Caring 27. Equality and social justice 28. Integrity 29. Honesty 30. Responsibility 31. Restraint

# INTERNAL ASSETS (2)

<p>Social Competencies</p>	<p>32. Planning and decision making 33. Interpersonal competence 34. Cultural competence 35. Resistance skills 36. Peaceful conflict resolution</p>
<p>Positive Identity</p>	<p>37. Personal power 38. Self-esteem 39. Sense of purpose 40. Positive view of personal future</p>

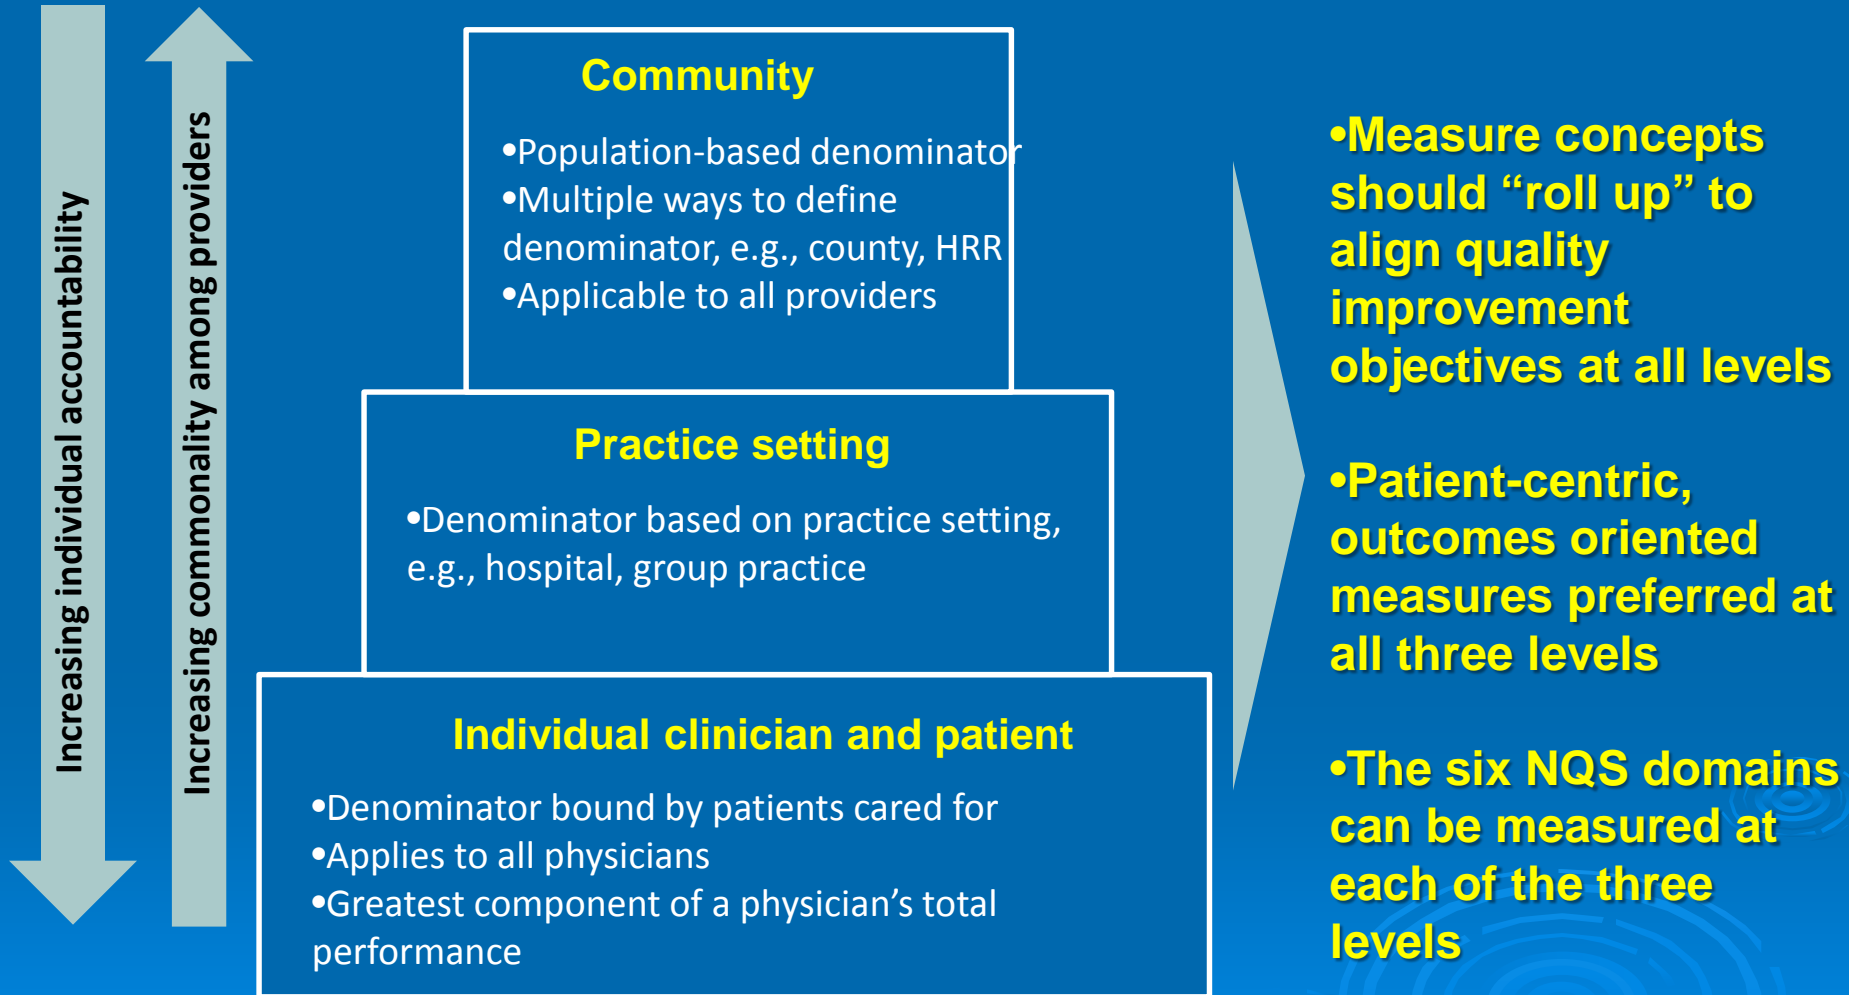

# CMS framework for measurement maps to the six national priorities

■ Greatest commonality of measure concepts across domains

- Measures should be patient-centered and outcome-oriented whenever possible
- Measure concepts in each of the six domains that are common across providers and settings can form a core set of measures

# Quality can be measured and improved at multiple levels

**PROPOSED INNOVATION:**  
**Family Health & Wellness Center**

A decorative graphic in the bottom right corner of the slide, consisting of several concentric circles of varying sizes, resembling ripples in water. The circles are light blue and semi-transparent, set against the solid blue background.

# FAMILY HEALTH & WELLNESS CENTER

## ➤ ADRC

- No wrong door approach
- Information and referral
- Person-centered screening, assessment and services
- Coordination of care
- Determine eligibility for public LTSS

## ➤ Recovery Centers

- Peer to peer services/supports
- Recovery coaching
- Increases recovery capital

# FAMILY HEALTH & WELLNESS CENTER 2

## ➤ Family Resource Centers

- Family education, supports and activities e.g., cultural, recreation, social
- Healthy family living skills

## ➤ The Center would provide:

- Bridge formal and informal systems of care
- Raise awareness and encourage social action
- Increase human, recovery and social capital
- Improve community health and wellness

# FAMILY HEALTH & WELLNESS CENTER <sup>3</sup>

- Builds upon already successful approaches
- A family and community-centered “place”
- Emphasis on increasing human, recovery and social capital
- Bridging formal and informal “systems of care”
- Addressing person/family and social issues
- Engage, convene and activate family, system and community stakeholders

# Key Takeaways

- Multiple and overlapping system “transformations” underway
  - Triple Aim , FFS to value based care
- Design and delivery changes
  - Inadequate capacity, workforce issues, continuum of care, recovery oriented system of care
- Use of IT
  - Data-driven decisions, clinical and administrative, Outputs to Outcomes to Quality of Life

# Key Takeaways 2

- Changing role of person/family from patient/client to collaborative partner
- Focus on social determinants of health at individual, family, and community level
  - Need for a community level, multi-sector governance and leadership structure
  - Reduce/eliminate stigma, discrimination, and disparities

**Need for a New Vision**

# Opportunities and Challenges of a Lifelong Health System

- Goal of system to optimize health outcomes and lower costs over much longer time horizons
- Payers, including Medicare and Medicaid, increasingly responsible for care for longer periods of time
- Health trajectories modifiable and compounded over time
- Importance of early years of life
