APS California Cross-Reporting and Referral Guide 2014
This page intentionally left blank.
This document is designed for use by the APS worker and APS Hotlines as a guide to cross-reporting and referring to other agencies who may be able to assist in all or part of an Adult Protective Services investigation. This guide is an enhancement and update to the grid in the All County Letter 00-16 dated February 28, 2000. Since 2000, there has been an increase in the number of agencies that may be useful in the investigation of elder and dependent adult abuse as well as changes and merges of existing agencies documented in the ACL where cross reports must be completed. The guide will help determine which agency may be used as a resource and how to go about reporting to that agency. In some cases reports can only be made with the client’s permission or with the client taking the lead, and in some cases cross-reporting is mandated and the APS worker must inform or involve other agencies. This guide is meant to be used as an electronic copy and contains hyperlinks within the documents and links to external references throughout. Each county is encouraged to add county-specific contact information and/or local guidance for each agency listed. This document does not imply or require listed agencies to provide any specific action to APS or to APS clients but is only a reference for possible referral and assistance.

General references below and each agency in the guide contain specific legal or program reference when applicable:

California Welfare & Institutions Code (“W&IC”) section 15640. (a) (1) An adult protective services agency shall immediately, or as soon as practically possible, report by telephone to the law enforcement agency having jurisdiction over the case any known or suspected instance of criminal activity, and to any public agency given responsibility for investigation in that jurisdiction of cases of elder and dependent adult abuse, every known or suspected instance of abuse pursuant to Section 15630 or 15630.1 of an elder or dependent adult. A county adult protective services agency shall also send a written report thereof within two working days of receiving the information concerning the incident to each agency to which it is required to make a telephone report under this subdivision.

Manual of Policy and Procedure Adult Protective Services Program section 33-130 (2) “Public agency” means the agency with the statutory authority to investigate known or suspected abuse of an elder or dependent adult.

(A) This definition of “public agency” has a more limited scope than what is generally recognized as a public agency, and applies only for the purposes of the adult protective services program under this division.

• Examples of public agencies may include, but are not limited to: adult protective services agencies; Office of the Long-Term Care Ombudsman; California Department of Mental Health; California Department of Developmental Services; California Department of Justice, Bureau of Medi-Cal Fraud and Elder Abuse; California Department of Consumer Affairs, Division of Investigation; licensing agencies; and professional licensing agencies.

• Professional licensing agency includes the various agencies, boards, bureaus, commissions, committees, departments, divisions, examining committees, or programs of the California Department of Consumer Affairs with the authority to issue a license, certificate, registration, or other means to engage in a business or profession regulated by the California Business and Professions Code. Examples include the Board of Dental Examiners, Board of Registered Nursing, Board of Behavioral Sciences, Medical Board of California, etc.

MPP 33-405.2 2 When jurisdiction to investigate reports of known or suspected abuse or neglect is shared with another public agency, county, or state, the adult protective services agencies shall investigate the specific allegations contained in the report that are within the adult protective services
agency’s jurisdiction, and cross report, as specified in Section 33-515.1, all other issues to the appropriate agency.

Agency Name: Code Enforcement

Agency Description:

Code enforcement agencies are defined under the law as care custodians, and as such are mandated reporters of elder/dependent adult abuse.

Code Enforcement is the prevention, detection, investigation and enforcement of violations of statutes or ordinances regulating public health, safety, and welfare, public works, business activities and consumer protection, building standards, land-use, or municipal affairs.

Code enforcement is a function local governments perform that citizens consider important for accomplishing community goals, such as protecting property values and the environment.

Others view code enforcement as an annoying intrusion into the free use of private property. Traditionally, it has been a process whereby local governments use various techniques to gain compliance with duly-adopted regulations such as land use and zoning ordinances, health and housing codes, sign standards, and uniform building and fire codes. In recent years, federal and state regulations governing air and water quality and the transport and storage of hazardous wastes, and requirements for implementing the Americans with Disabilities Act have come into play. Local governments are now obliged to include enforcement of these rules and regulations in the array of responsibilities they assume for protecting the public health and welfare.

What to Report:

County's local APS intake.

APS should report any violations of laws regulating public nuisance, public health, safety, and welfare, public works, business activities and consumer protection, building standards, land-use, or municipal affairs to code enforcement.
