Ventura County
Mobility Project
"iPad" Tablet Deployment

CWDA Annual Conference
Long Beach, California
October 3-5, 2012

Presented by
Barry L. Zimmerman
Director- Human Services Agency
County of Ventura

Mobility Project Goals

- Provide field workers with as many tools as possible (away from the office)

- Make tools simple, easy and valuable

- Have "office" utility in the field

- Maximize productivity in the field – speed and efficiency

- On-going solutions to be generated for both Children and Adult field-based social workers
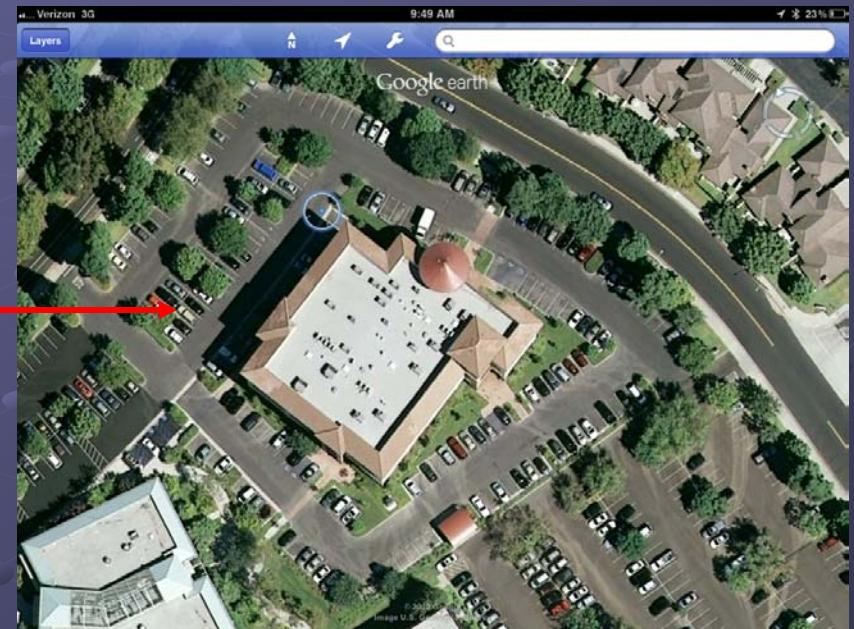

- Affordable solutions

iPad

- iPad – simple and easy to use

- User-friendly

- Internet and Systems Access

- Provides access to many tools and information

- Client-friendly (unnoticed by clients)

Functionality of iPad
(with existing free apps)

- Simple apps empower the workers in the field:

  - Google Earth was used to plan a visitation to a house with law enforcement accompanying the worker. Using Google Earth, the property layout was assessed and a plan was developed positioning each staff resource to ensure maximum safety.

# Functionality of iPad
(with existing free apps)

- Simple apps empower the workers with knowledge:

  - A free app on children health can be used to understand potential health issues and normal healthy growth of children
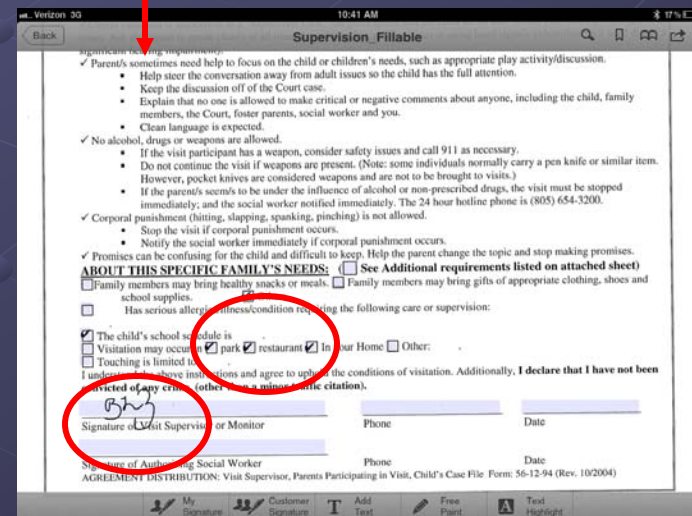

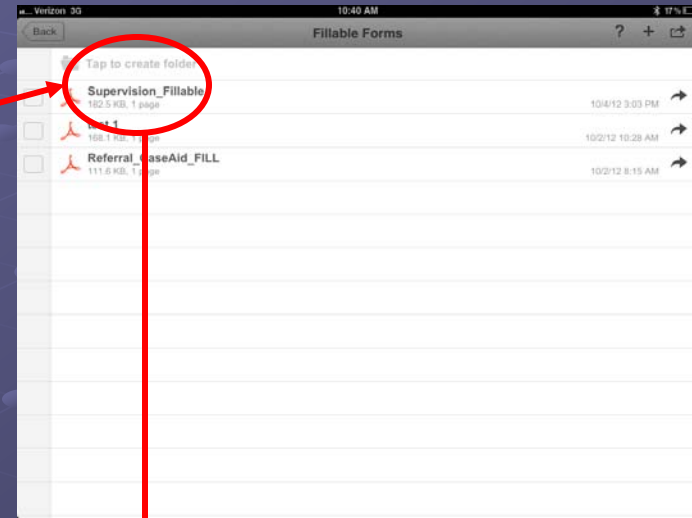

Functionality of iPad
(with existing free apps)

Simple apps also make the employee more productive:

A free app to track trips and mileage can help the worker manage mileage claims. Can be used manually or with GPS to track miles traveled.

Trip Report can be e-mailed to Supervisor or Fiscal directly

Functionality of iPad for specific field based operations

- Fillable PDF forms allows the worker to produce documents from the field by filling in the needed information, including signatures

- Completed forms can be saved, e-mailed, faxed or printed with an air printer.
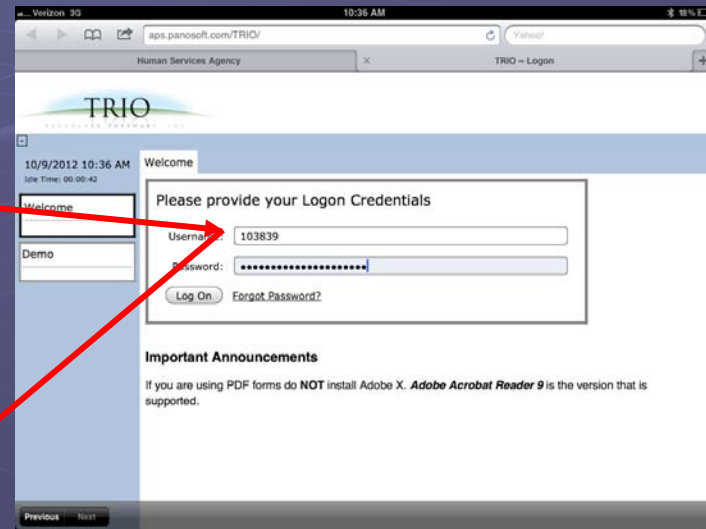

Functionality of iPad for specific field based operations

- Using the scan app, documents can be scanned and managed as an electronic photo copy.

- Scanned documents can be saved, e-mailed, faxed or printed with an air printer.
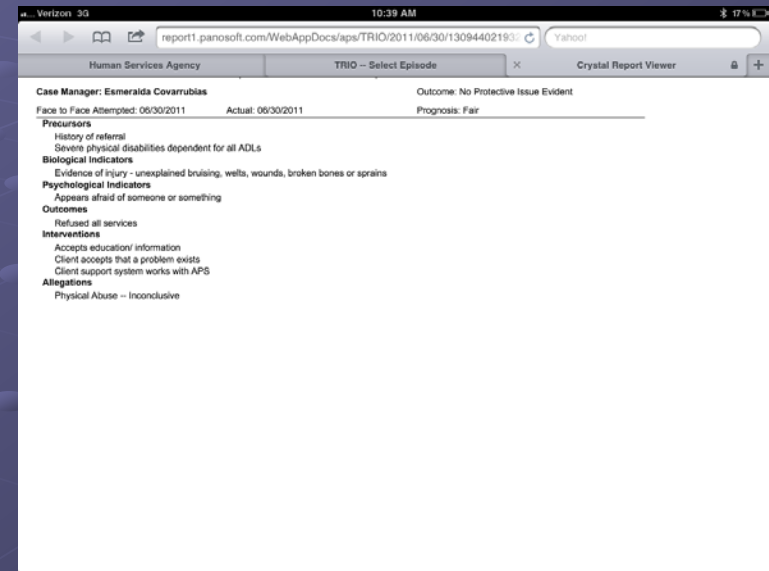

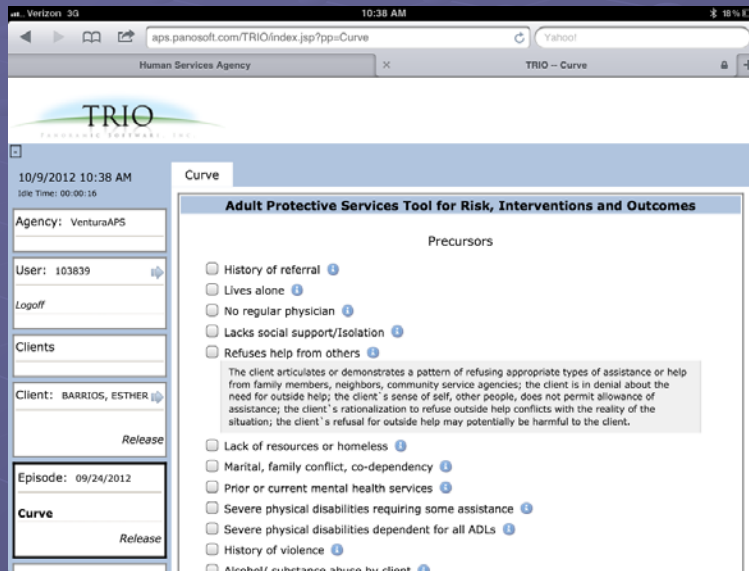

iPad Access Directly to Case Management Systems and Tools – APS

- The APS-TRIO is a risk assessment tool used by APS-Social Workers

- Access via the Internet the workers are able to perform this assessment in the field.

iPad Access Directly to Case Management Systems and Tools – APS

- Access in the field allows for greater data integrity, minimal delay in data entry, and real-time feedback and information access.

- Information from the case management system is readily available with any internet-based tablet or device.
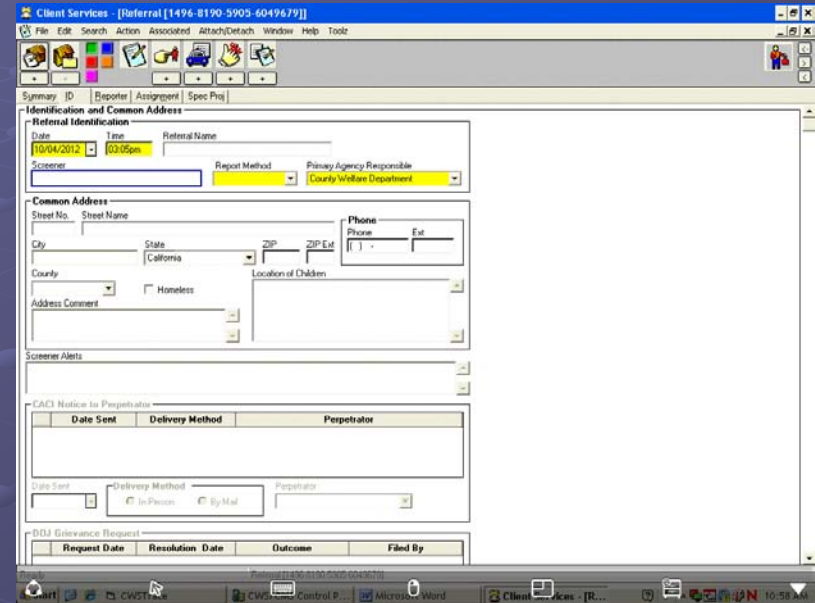

iPad Access Directly to CWS/CMS for CPS Social Workers

- Through the use of Mobile VPN and PocketCloud the worker is able to securely connect to HSA's network and create a virtual desktop – accessing their workstation

iPad Access Directly to CWS/CMS for CPS Social Workers

- Using PocketCloud, the user is able to securely access their desktop as a virtual desktop session.

- PocketCloud allows full utility of your workstation remotely

- The CWS/CMS application is operated on the network and only accessed via the iPad

Ventura County
iPad Mobility Project

- Allows the worker to:

  - Have Internet access to community resources and information

  - Access their case management systems and tools, including CWS/CMS (secured access)

  - Use a simply, small and easy to carry "office"

  - Have no delay in connection speed or boot up time

  - Have access to thousands of apps and tools (many at no cost or minimal cost)
