Presentation Overview

- How We Got Here
- County Eligibility Systems Background
- Key Eligibility Business Needs
- Alternative Approaches
- What SAWS Programming Includes
- How SAWS Programming Meets Needs
- DHCS Possible Alternative
How We Got Here

- Waiver renewal workgroup discussions in 2010
- Backlogs of cases in existing Coverage Initiative counties
  - Largely driven by DRA Citizenship Documentation rules
  - Paper-based process, not electronic as human services has now
- Led to discussion of how CI’s could get DRA information . . .
  - More timely
  - Electronically to greatest extent possible
- Realized the SAWS Consortia may be able to assist counties
- Simultaneously, DHCS was considering options
Alternative Approaches

- SAWS Consortium System
- DHCS LIHP Possible Solution
County Eligibility Systems

- **Statewide Automated Welfare System (SAWS)** is collective name for three eligibility consortia:
  - LEADER (Los Angeles), CalWIN (18 cos), C-IV (39 cos)
  - Each consortium has about 1/3 of the statewide caseload
- **Include:**
  - Medi-Cal, CalWORKs, CalFresh, and CMSP
  - Initial and ongoing eligibility logic; directly linked to MEDS
  - Online applications, without need to re-key data into SAWS
Key LIHP Eligibility Business Needs

- Ensure timely eligibility determination
- Avoid full Medi-Cal process if no linkage
- Develop data tracking capacity
- Facilitate entry into MEDS
  - Important for federal draw-down now
  - Vital to get cases into 100% federal funds in 2014
- Meet citizenship documentation requirement
What SAWS Programming Includes

- Internet-based Data Entry
- Data Tracking Capacity
- Link to MEDS
- Automated SSN Check to meet Citizenship Documentation Requirements via MEDS
How SAWS Programming Meets Needs

- Timely and convenient
  - Automated rather than manual
  - Available wherever Internet access exists
- Allows for LIHP-only process, not requiring full Medi-Cal
  - Can be used by health department staff
  - Staff choose path based on screen for linkage
- LIHP reporting to MEDS
  - Eases data tracking, facilitates federal draw-down
- Conducts electronic SSN match
  - 94% of SSNs match; obviates need to collect paper documents
  - Speeds ability to start drawing down federal funds
Using SAWS

- Allows county flexibility to use health or human services staff to do LIHP eligibility.
- Builds the “bridge to health reform” promised by the 1115 Waiver.
- Allows faster connection to full Medi-Cal for those whose circumstances change.
- Avoids need to do full Medi-Cal for those who clearly have no linkage.
Time Frames

- Staggered start dates for non-CMSP counties
- January 1, 2012 for CMSP
DHCS Possible Alternative

• External eligibility determination
  • Automated system
  • Manual

• Directly Access to MEDS for LIHP data entry

• Citizenship verification triggered & returned
